

System Solutions

Hotels

The feeling of being at home

Every guest should feel at ease in your hotel from the very start. Whisper-quiet and easy to operate Kampmann technology will create an individual feel-good atmosphere.

Everything from a single source

Don't waste any time coordinating between various trades. Kampmann is your partner for cross-trade systems.

Your strong partner

Assured: we will be right at your side every step of the way from planning through to our After Sales Service. Benefit from our individual solutions and decades of experience.

An ace up your sleeve!

The new EC technology is a evolution in drive technology. It considerably enhances DC motor technology even at low output ranges. Energy is used more efficiently.

A networked hotel

Two routes that lead to the ideal climate: guests regulate the room temperature using a KaControl controller or you manage it from reception using booking software or the BMS. It goes without saying that you can intervene centrally at any time.

Your building enhancer

Sustainability is good. Certification is better.
As a GreenBuilding Endorser, the value of
your hotel property matters to us.
Tell us about your individual,
energy-optimised
building concept!

- ① Venkon EC
- ② Venkon hotel casing
- ③ KaControl
- ④ Door air curtains
- ⑤ Entrance mats

- ⑥ Katherm trench systems
- ⑦ KaCool D
- ⑧ Airblock KG
- ⑨ Chillers

Uses

- lobby
- meeting room/hall
- hotel room
- utility room

Functions

- Heating
- Cooling
- Ventilation

Venkon EC fan coil units

- ▶ Top quality "made in Germany" workmanship
- ▶ Sound-optimised design
- ▶ Hygiene certified in accordance with VDI 6022
- ▶ Innovative accessories
- ▶ The quietest on the market

Venkon hotel casing

- ▶ Easy and quick installation
- ▶ Saves time-consuming coordination between various trades
- ▶ Fan coil unit fully accessible
- ▶ Wipe-clean housing
- ▶ Service flap ensures quick and clean access for maintenance work
- ▶ Saves investment and operating costs
- ▶ Available in all RAL colours

KaControl room automation

- ▶ Convenient designer room control unit with LED backlighting
- ▶ Display optimised for the user
- ▶ Intuitive, language-independent operation
- ▶ Automatic function; can be operated by guests
- ▶ Setback mode via window contact, for instance
- ▶ Connection to the hotel booking software via a BACnet gateway

KaControl control system, for complete project solutions

- ▶ Brings central and decentral solutions into a functioning comprehensive system
- ▶ With interfaces to leading BMS standards BACnet, Modbus and LON for optimum interaction
- ▶ Optional monitoring of operating and consumption data via a KaControl controller

Savings through KaControl room automation

- ▶ Savings of electrical energy for the air conditioning
- ▶ Savings of thermal energy

Door air curtains

- ▶ Effectively protect against the ingress of cold air in winter
- ▶ Reduce the ingress of warm air in summer
- ▶ Minimise energy loss through innovative tandem technology
- ▶ Continuously filter the air that is drawn into the room
- ▶ Use accumulated heat from upper ceiling areas for air screening
- ▶ Essential for a perfect welcome for guests in a foyer, for entrances to terraces, trade entrances, etc.

Entrance mats

- ▶ Robust in their shape and workmanship
- ▶ Reliable under foot
- ▶ Neat and easy to clean
- ▶ Quiet and comfortable to walk on
- ▶ Durable for decades
- ▶ Range of colours
- ▶ For clean and prestigiously designed entrance areas
- ▶ Manufactured for a perfect fit

Katherm trench systems

- ▶ Countless functional options for every application
- ▶ Blend visually into any room concept
- ▶ Durable and energy-efficient thanks to sustainable technologies
- ▶ Robust grilles increase the usable space
- ▶ Ideal for all rooms with floor-to-ceiling windows

Also worth knowing

Project management reliability with the market leader in trench systems. Curved designs? Recesses? Mitred corners? We are your partner for challenging project designs!

KaCool D

- ▶ Designer panel in RAL 9003 (signal white)
- ▶ Dimensions tailored to ceiling grids
- ▶ 6 sizes for the optimum adjustment of the performance
- ▶ Choice of 3-stage AC or infinitely variable EC fans
- ▶ Option to feed fresh air through a recirculating air connector
- ▶ Comprehensive range of accessories available

Chillers

- ▶ Chillers can be optimally designed for buildings due to the wide variety of sizes, output levels and models
- ▶ Large selection of accessories such as:
 - ▶ Heat recovery for the heating up of service water
 - ▶ Free-cooling function for the use of fresh air for cooling

The required refrigerant quantities are reduced to a minimum through the use of water as a cooling medium, thus prolonging statutory inspection and maintenance intervals and protecting the environment at the same time.

Ventilation unit Airblock KG

- ▶ Air volumes of 1,600 m³/h to 13,800 m³/h in six unit sizes
- ▶ Maximum energy efficiency due to low internal pressure losses
- ▶ Minimum sound emissions due to low air speeds
- ▶ Centralised ventilation, decentralised temperature regulation through Venkon units in the hotel rooms
- ▶ Weather-proof design
- ▶ Maximum mechanical housing stability - class D1

With KaControl building automation:

- ▶ Integrated recording of the infinitely variable EC motor operating and consumption data
- ▶ For remote monitoring and integration into energy management systems
